**TRAC Group and Versatile Technology
announce Strategic Partnership**

Released: 19th April 2005

TRAC Measurement Systems Ltd based in UK and Versatile Technology Pty Ltd based in Australia have today agreed a Strategic Partnership aimed at global co-operation covering the complete range of existing and future Test and Inspection equipment supplied by both companies to the Metal Packaging industry.

As part of the arrangement TRAC will provide a complete Sales, Customer Support and Spare Parts service for all VT products in the wider European market and in return VT will provide the same service for all TRAC equipment in the South Asia Pacific region. Further co-operation across other key global markets is also under consideration. The agreement includes an option for joint development programs aimed at sharing high level mechanical / electrical and software design resources and knowledge across both companies and an open exchange of technologies and ideas to aid continuous product improvement. An intensive training and familiarisation programme is already underway and is due to be completed in the near future.

TRAC Measurement Systems Ltd, a member of the TRAC Group of engineering companies, and Versatile Technology Pty Ltd are long established suppliers of quality control and inspection gauges and systems and provide a wide range of in-line, automated and manual equipment. This agreement will enhance the opportunities for both companies to offer complete quality solutions and a world class support service to customers worldwide.
